EXPERIENCES

→**Intern – Feedback and Corruption Suggestion System**
Mint, February 2024 – June 2024

- Assisted in managing public feedback and processing corruption-related suggestions submitted to the system.
- Contributed to the analysis and categorization of complaints and suggestions to improve departmental transparency.
- Supported the team in drafting reports and summaries to assist decision-makers.
- Helped enhance user experience by identifying common bottlenecks in feedback processing workflows

- **Mobile App Developer – Final Year Project: Visit Ethiopia**

Built a tourism app featuring interactive content on Ethiopian cultural and historical sites.
Integrated maps, multilingual support, and intuitive UI using Android Studio and Firebase.
Collaborated in a 5- person team; presented at final project expo with positive faculty feedback.
